

FLARE TOOLS

FEATURES

- Quality flaring tools for use on Type K soft copper tubing.

Hardened and tempered steel flare tools make 45° flares on Type K soft copper water service tubing. Flare tools have larger pilots and finger grip areas for safety. Use with HAM3 brass hammer for safety.

ROUND IT® STRAIGHTENER/REROUNDERS

FEATURES

- Take the trouble out of handling copper rolls by using Reed Round It® tools for straightening and rerounding.
- Provides the needed leverage to guide tube into position for fit-ups.
- Tools will quickly pay for themselves in material, labor and time savings.

Time-and-material saving CSR2 Round It® Straightener/Rerounder handles 1 1/2" and 2" K annealed copper. Grips the end of a coil so uncoiling is easy; rerounds oval tubing anywhere along its length so a cutter will track or the fitting will seal properly. Provides safe grip when flaring, and guides copper into alignment for easier fit-ups. RCR3/4 and RCR1 tools are especially useful when tubing is wet for a solid grip when straightening and fitting up. RCR341 offers all the same features as both RCR1 and RCR3/4 and includes jaws for either size tubing. The long-handled RCR rerounders are beneficial when extra leverage is needed.
