

ROUND IT® STRAIGHTENER/REROUNDERS

FEATURES

- **Take the trouble out** of handling copper rolls by using Reed Round It® tools for straightening and rerounding.
- Provides the **needed leverage** to guide tube into position for fit-ups.
- Tools will **quickly pay for themselves** in material, labor and time savings.

Time-and-material saving **CSR2** Round It® Straightener/Rerounder handles 1 1/2" and 2" K annealed copper. Grips the end of a coil so uncoiling is easy; rerounds oval tubing anywhere along its length so a cutter will track or the fitting will seal properly. Provides safe grip when flaring, and guides copper into alignment for easier fit-ups. **RCR3/4** and **RCR1** tools are especially useful when tubing is wet for a solid grip when straightening and fitting up. **RCR341** offers all the same features as both RCR1 and RCR3/4 and includes jaws for either size tubing. The long-handled RCR rerounders are beneficial when extra leverage is needed.
